Model: CPT-170M-BBC1151

Introduction

This industrial-grade touch screen is a rugged human-computer interaction device with an aluminum alloy structure and low power consumption. With its stable performance, it performs well in industrial applications. The design of the whole machine focuses on reliability, environmental adaptability, scalability, compatibility, etc. It is widely used in smart production workshops, industrial control equipment, mechanical equipment, power cabinets, visual inspection equipment, artificial intelligence, commercial terminals, ship-mounted vehicles, smart medical care, smart transportation and other fields.
